SUPERIOR FLOW CAPACITY SAVES ENERGY

- Spinweld technology allows for larger and more efficient inside diameters.
- 180° goosenecks have less than half the friction loss of comparable products (1 psi {0.07 bar} of friction loss @ 22 gpm {83 lpm}).

DURABLE AND CORROSION-RESISTANT PLASTIC

- Lower cost than traditional metal goosenecks.
- Will not rust over time, therefore prevents nozzle plugging.
- Can handle intense tension force.

3/4" MNPT INLET

- Eliminates extra fittings and provides easier and more reliable installation into span pipe.

INSTALLATION NOTES:

- If adding sealant, use only Teflon tape or pipe lubricants safe for plastics.
- When used on semi-rigid or rigid drops, limit drop length to 96 inches (2.4 m) AND one foot (0.31 m) below trussing in span center.
- For ease of installation, retrofit packages may require chasing coupler threads with a tap.
